ZonKoSea Fully Automatic Roti Maker

Roti / Tortilla / Chapati — flour & water in, finished flatbread out

ZK-RT01 at work — color touch panel, visible kneading chamber, automatic baking

Key Features

- **Fully automatic operation:** fill the separate flour, water and oil containers — the machine kneads, flattens, bakes and delivers the finished roti / tortilla automatically. No messy countertops.
- **Fast cycle:** about **80 seconds** per roti / chapati / tortilla, with kneading and baking running at the same time for continuous output.
- **Precision fluid supply:** peristaltic pumps dose water and oil accurately; sealed pipelines with auto-clean function stay hygienic.
- **Quiet & durable:** brushless motor with pulley-and-gear drive — low noise, low power consumption, long-term stability.
- **Safety protection:** sensors in the baking area stop the press instantly and sound a buzzer alarm if a foreign object enters.
- **Easy to watch & clean:** transparent window for the kneading and baking process; water and oil chambers separated for easy cleaning.
